To whom it may concern,

Statement

Concerning

2011/65/EC, RoHS II amended by RoHS III

Considering the use of MOWITAL® B grades in electrical and electronic equipment (Directive 2011/65/EC and amended by Directive 2015/863/EU and its current revised versions) the following applies:

Spot checks regarding the heavy metal content of the MOWITAL® B grades showed that the content of Pb, Cr, Hg, Ni, Cu, Cd and Hg is less than 10 mg/kg for each of these heavy metals (analysis by ICP-OES). Periodical controls of the heavy metal content are established for Cd, Pb, Hg and Cr (VI).

We hereby also confirm the absence of

- o Polybrominated biphenyls (PBB) and
- o Polybrominated diphenyl ethers (PBDE)
- o Butylbenzylphthalat (BBP)
- o Di(2-ethylhexyl)phthalat (DEHP)
- o Dibutylphthalat (DBP)
- o Diisobutylphthalat (DIBP)

The above-mentioned substances are not intentionally used to produce our MOWITAL® B product line nor are they added after the manufacturing processes. Controls of the content of the respective substances in MOWITAL® B grades are not established.

Kuraray Europe GmbH makes no warranties, express or implied, and assumes no liability in connection with any use of this information. Above information is intended to support Kuraray customers in fulfilling their regulatory obligations and requirements. The final verification of finished product compliance with migration limits and other applicable requirements of the regulations is the responsibility of the finished product manufacturers considering their specific intended use.

Dr. Shu-Hsien Li
